

# RegDOX Redefines Cloud Storage for Export-Regulated Documents

January 16, 2017 09:38 AM Eastern Standard Time

NASHUA, N.H.--([BUSINESS WIRE](#))--RegDOX Solutions Inc., the leading cloud-based storage company for regulated documents, is changing the rules for small to medium sized enterprises (SMEs) managing export-regulated documents with the announcement of RegDOX® On the Fives. Up until now, only large enterprises have been able to use cloud-based storage solutions for export-regulated documents. Now this leading-edge solution is available to all companies.

With the 2015 introduction of its patent-pending, DDTC (Directorate of Defense Trade Controls) reviewed technology, RegDOX revolutionized compliance with the two sets of regulations of export-controlled information: the ITAR (International Traffic in Arms Regulations) and the Export Administration Regulations (EAR). This technology enabled the first, and to date only, secure online storage and collaboration solution that complies with both the ITAR and EAR. RegDOX is now extending this revolution to SMEs with the launch of RegDOX® On the Fives.

Here's how RegDOX® On the Fives works:

For a minimal cost, RegDOX® On the Fives gives an SME unrestricted access to a RegDOX ITAR/EAR-compliant Secure Data Room Center and its features enabling companies to prevent inadvertent, careless, and malicious exports of documents and then have tamper-proof logs to prove compliance. This unprecedented protection is provided for a flat subscription fee of \$500 a month for up to 5 users and 5 GB of storage. The first 5 weeks are free and the subscription fee user covers support and solution maintenance.

The first subscription term is one year after the first-month free period ends. Additional storage and users can be ordered at any time for monthly fees of \$55 a GB and \$55 a user, or for a combination of one user and a GB for \$75 a month. The set-up, training and consulting fee to get going is \$500, but that is waived for a two-year term or greater.

On the launch of this program, William O'Brien, the CEO of RegDOX said, "This first and only full-function, commercial cloud storage solution for export-controlled documents has proved particularly useful for large companies and we have found strong interest also exists among SMEs for their compliance needs. Now, with RegDOX® On the Fives, even small and medium-sized companies can achieve ITAR and EAR compliance with ease and affordability."
